

# PRESERVING ONTARIO'S HEADWATERS

## A community workshop for the Credit River Watershed

Headwaters consist of small streams and wetlands. Together, they constitute most of the length and provide the majority of the flow, nutrients, organic material, and niche habitats of our watercourses.

To help preserve these valuable components of our regional ecosystems, please join us at a community workshop to discuss:

- the importance of Ontario's headwaters,
- current policy & stewardship initiatives, and
- collaborative efforts for the future.

The workshop is part of a series being coordinated by the Ontario Headwaters Institute thanks to funding from the Ontario Trillium Foundation and extensive support from conservation authorities and both local event and regional communication partners, including Credit Valley Conservation and Trout Unlimited Canada.

**When** 6 – 9 pm, Thursday, March 4, 2010

**Where** Watershed Learning Centre  
Terra Cotta Conservation Area  
See map below

### Agenda

6:00 – 6:30	Arrivals, Coffee, Sandwiches
6:30 – 6:45	Welcome and Round-table Introductions Trout Unlimited Canada – Greg Clark Chapter
