

PRESERVING ONTARIO'S HEADWATERS

A community workshop with Kawartha Conservation

Headwaters consist of small streams and wetlands. Together, they constitute most of the length and provide the majority of the flow, nutrients, organic material, and niche habitats of our watercourses.

To help preserve these valuable components of our regional ecosystems, please join us at a community workshop to discuss:

- the importance of Ontario's headwaters,
- current policy & stewardship initiatives, and
- collaborative efforts for the future.

The workshop is part of a series being coordinated by the Ontario Headwaters Institute thanks to funding from the Ontario Trillium Foundation and extensive support from conservation authorities and both local event and regional communication partners, including Kawartha Conservation and the Community Stream Steward Program.

When 6 – 9 pm, Thursday, March 11, 2010

Where Nestleton Community Centre
3971 Highway 7A, Nestleton Station
See map below

Agenda

6:00 – 6:30	Arrivals, Coffee
